PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of experience designing and deploying scalable web applications, RESTful microservices, and reactive user interfaces. Proven track record reducing API response latency by 45% and managing systems handling over 50k daily active users.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks: FastAPI, React, Node.js, Next.js, Django, Tailwind
Tools & Cloud: Docker, Kubernetes, AWS, PostgreSQL, Redis, Git, Linux, CI/CD

EXPERIENCE

Senior Full Stack Developer | Apex Cloud Systems | 2023 - Present
- Architected and deployed microservices using FastAPI and PostgreSQL handling 20,000 requests per minute.
- Integrated Redis distributed caching which reduced database query latency by 40% across top endpoints.
- Designed responsive React dashboards with TypeScript and Tailwind CSS, increasing user engagement by 25%.

Software Engineer Intern | NexaTech Solutions | 2022 - 2023
- Developed RESTful APIs in Python and integrated third-party payment gateways with automated retry logic.
- Implemented Docker containerization for local development environments, decreasing onboarding time by 50%.

PROJECTS

Distributed Task Queue Engine | Python, Redis, Docker
Engineered an asynchronous task distribution pipeline processing 15,000 background jobs per hour with zero message loss.
Real-time Analytics Dashboard | React, TypeScript, FastAPI, WebSockets
Constructed real-time visualization platform streaming telemetry data with sub-100ms render latency.

EDUCATION

Bachelor of Technology in Computer Science | California Institute of Technology | 2019 - 2023

CERTIFICATIONS

AWS Certified Solutions Architect - Associate
